The idea behind the Cité du Chocolat started in 2006 following several educational Events introduced by Valrhona, including the 'Destination Chocolat' Exhibition in 1992. This Touring Exhibition generated more than 500,000 visitors. Valrhona realized that it would be a good idea to open its doors to the widest audience possible and decided to set up a tour around chocolate. La Cité du Chocolat Valrhona opened its doors to the general public in Train l' Hermitage (in the Rhône Region - France) in 2013.

In 2016, Valrhona unveiled a new Exhibition Site on the first floor, covering more than 700 m2. The ambition is to take the visitors to a full journey, from cocoa beans to the creations of pâtisseries, chocolate making factory, chocolate coating production line... A real immersion into the world of chocolate designed for chocolate lovers and enthusiasts of all ages.

From the beginning of the project, the scenography was based on research into the way visitors interact with each other, the five senses and the different activities on offer. The common theme is : taste, movement and subject matter. The Cité du Chocolat was designed as a continuation to the historical chocolate making building.

Having been located in the Train l'Hermitage town center for 90 years, Valrhona decided to move its chocolate making production out to the edge of town... These days, Valrhona is an international business, but is one which attaches great importance to its Drôme and Rhône-Alpes Region roots. This increasingly renowned tourist spot was designed as a means of making the Region more dynamic and now features among the network of 'must-sees' in the local and regional area.

Valrhona also invests in the region's large-scale projects such as the creation of the Cité de la Gastronomie in Lyon and Valence planned for the coming year. These locations will speak for themselves in terms of gastronomy and French Art de Vivre having the main aim to promote transition, exchange and creation...
